

LASER AUDIO and VIDEO

A big 10" super bright colour LCD screen adorns this great portable DVD (and CD) player. Not only does it play content from discs, but electronic files on USB storage media can also be played back. It comes with a full function remote control as well as a home power adaptor (240v in the wall) and a car power adaptor (12v cigarette socket). Once the built-in Lithium Ion battery is charged, you can take it anywhere - in the car, on a plane. The screen flips back 180 degrees to give you a multitude of viewing options.

Bonus pack includes:

Earphones, Power adaptor, AV cable (connect to TV), Car charger, Remote control

10" PORTABLE DVD PLAYER
