

My PhotoBook

Staple SteelBinding

...a simple, quick and inexpensive photobook binding solution!

UNIBIND's new "My PhotoBook" system is now available from C-Direct. My PhotoBook uses a steel staple assembly, so it's really easy to use, produces a professional finish in minutes and is very competitively priced.

No specialised binding machine needed, only a stapler!

Simply align your printed pages, with the supplied "endsheet" on the spine edge. Place the assembled pages into the stapler guide and staple. Put the stapled pages into the hardcover book, remove the adhesive backing and close the cover. Your photo book is complete.

The My PhotoBook covers are available in stylish black, in a variety of useful sizes: 8x10, 6x8, 4x6 and 8.5 x 11 to suit pages from the DL2100 Duplex printer.

Introducing UNICALENDAR...

Here's a brilliant solution to providing professionally finished calendar in-store! UniCalendar uses a spiral wire bound system mounted with 13 adhesive strips to attach 8x10 photo prints for each of 12 months and a cover sheet. So easy to use!

All you need to get started is the "Calendar Guide" to aid assembly (about \$14) and a pack of 10 calendars (about \$5 each)

COMING SOON:

The My PhotoBook Collection - a range of 4x6 covers with great designs and colours, ready to sell off-the-shelf to create beautiful photo books. Unfortunately, the samples and promo images did not arrive in time to make it into this newsletter!
