

## Kodak s1220 Scanning System

a fast, easy way to digitize photos

### Find new profits in your customers' old photos!

Millions of families have trillions of treasured photos that were taken before the era of digital photography. And more than 95 percent of these photos are aging in shoeboxes or albums, seemingly doomed to obscurity, yet begging to be seen and shared with friends and family. Think of the revenue opportunities - your customers would love to have digital versions of their photos for e-mail sharing, displaying, printing, output to digital media and more.

The Kodak s1220, with its combination of a compact, fast, auto-feeding scanner and powerful, user-friendly software, enables you to digitize hundreds of photos (as well as postcards and other memorabilia) in minutes.

There's no need to prep photos individually for scanning. Just place that disorganised stack in the feeder and the Kodak s1220's smart feeding handles it all at up to 30 photos per minute—while the application software straightens images automatically. Single photos or stacks. Mixed paper weights. Wallets or portrait-size. Last year or last century.

### There's never been a better time to invest!

**RRP \$329**

Kodak M820 Digital Frame

We have sweetened the deal with a **10% discount from usual pricing**. On top of that, you could take advantage of the Federal Government's Business Tax Break! Eligible small businesses are now able to claim a **bonus tax deduction of 50%** of the cost of eligible assets costing \$1000 or more acquired before 30 June 09, and installed by 31 December 2010. That must make investing in your own business even more attractive!

And if that's not enough incentive, we're throwing in an **extra BONUS!** Order your Kodak s1220 System from C-Direct and you will also receive a beautiful Kodak M820 digital frame, retail value \$329.
